Direct Questions to Adam Sokol, Director of Assessment, Department of Student Life—

Introduction

As part of our efforts to provide relevant, up-to-date, information in a timely manner. This report will work to update and inform offices during the semester of event attendance and other demographic information.

Methodology

The data is collected via Garnet Gate. Two reports are generated, one for the students and another for the events. The two files are combined based on **eventID**. Then a third (3rd) set of data with **Department** and **Team** fields is attached. The data is run through an R process to clean and create the columns used in this report.

The results show breakdowns for each office starting with the Russell House (RHUU) as well as each office's subgroups. The Sub groups were established during the 20024-25 academic year.

Results

Student Life Overall

This section examines the overall counts of students by gender, race\ethnicity, college, class standing, transfer, and first-generation status.

This section examines the overall demographic information. These numbers **exclude** faculty/staff attendees. It should be noted that Student Government Election data is not included in this report because the data was not available at the time of this report.

Direct Questions to Adam Sokol, Director of Assessment, Department of Student Life—
803-544-1349

Student Life had total of 20,609 interactions with 11,434 students. Notice also that the majority of our unique interactions are with female students. Next we will examine which colleges have the most attendees at our events.

Class Standing is determined by the number of course hours completed, and not by how many years students have completed. The table shows not only the breakdown by undergraduate class, but also provides counts for our professional colleges.

Table 3: Unique Student Interactions by Class Standing

Class Standing	Count	Percentage(%)
Sophomore	2,593	22.68%

The most interesting piece of information here is that the Seniors are more active than the Freshman.

Since many students begin their college careers with some college credits through early enrollment, AP courses in High School, these students may be considered Sophmores or Juniors which can skew the numbers. Inspecting the data through the lens of what cohort they fall in with can deliver additional information.
